

Recommendation letter for Mr. Ibrahim Raouh

I have had the pleasure to have Ibrahim Raouh as a student in Khalil Gibran School. He always showed a great interest to learning, always participating in class. He has been more than the ideal student to achieve the highest grades. He has also demonstrated outstanding leadership and maintained a clear sense of purpose. Due to his personality and abilities, I could always count on him as an instructor as well as a leader of the group. His sense of responsibility and self-motivation have made of him the best example among his classmates. As a principal, I was impressed by the way he gets along with the class and how he behaves and acts taking into account both his objectives and the class. He is a student with a strong character and an admirable attitude. He is one of my exceptional students. Additionally, he is hardworking and truly dedicated in his studies and work. Ibrahim has a keen interest in physics, mathematics and scientific inquiry. He is perceptive, quick and sharp with a high aptitude for those subjects. His advanced passion for them makes him an ideal fit for rigorous research and innovation. Ibrahim's personal strengths are as impressive as his intellectual accomplishments. I highly appreciate his inquisitive mind, active participation in lessons and brainstorming, his dedication to learning, his ambitions as well as his respectful attitude and behavior towards his teachers and peers. I am confident that Ibrahim will excel in any program that he chooses to pursue. For the above considerations, I have no doubt that Ibrahim has the potential to undertake undergraduate studies in any higher education institution and that he will benefit enormously from the stimulating environment that your institution can offer to outstanding students. It is for these reasons that I offer high recommendations for Ibrahim without reservation. His drive and abilities will truly be an asset to your institution. For further questions regarding him, please do not hesitate to contact me.
